PALOS HEIGHTS, IL 60463

David Keeton
DOB 08/26/1962
To whom it may concern :

David Keeton is a 62 year old male who has been under my care for multiple medical conditions since 2001 including Valvular Heart Disease s/p Aortic valve replacement requiring blood anticoagulants, Thrombocytopenia, Iron Deficiency anemia, Hypotension, Dizziness, exertion dyspnea, fatigue, atypical chest pain, arthopathy, and frequent falls. David also has progressive cognitive decline, intellectual limitations, poor memory recall, and poor communication skills. His cognitive as well as physical limitations as described prevent David from managing daily tasks, keeping appointments, following general instructions, climbing stairs, communicating with others, and carrying out ADLs such as doing house chores.

To insure that David can live and enjoy his apartment community and maintain a safe living environment , I recommend the following accommodations : First Floor Unit, Installation of grab bars in bathroom/ shower, insure clear/ well lit pathways, an emotional support pet, and Jonathon Edling and /or Joshua Drinkwater to be the contact for any communications you would typically have with him. Thank you for providing this reasonable accommodation for David, and helping him live his fullest and safest life in your community.

Thank you in advance for your understanding.Please feel for to call me if I can be of any further assistance with regards to Mr David Keeton

Sincerely,

Osama K Atieh MD
